No. 405.—Set as above but Jennings pattern Auger Bits.

RIDGWAY "FLATBIT" No. 355

**The most significant advance ever in wood boring capacity
with 1/4" Electric Drills.**

Even in a small capacity electric drill it is possible to bore up to 1" diameter in soft or hard wood.

It is equally useful in small Bench Drills and will be found to bore fast, clean and accurate.

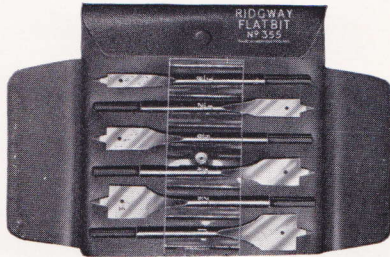

Sharpening is easy with a slip stone, or in case of damage, e.g., from a nail, by using a small abrasive wheel.

Note the shank with three flats which ensures no slip in the drill chuck.

Note the "hang up" hole in the blade.

Set of 6 sizes
($\frac{3}{8}$ " $\frac{1}{2}$ " $\frac{5}{8}$ " $\frac{3}{4}$ " $\frac{7}{8}$ " and 1")
in an attractive plastic roll.

Also available in individual
sizes, including 1 $\frac{1}{4}$ ", and
in Dispenser Pack con-
taining 2 $\frac{1}{2}$ dozen in
assorted sizes.

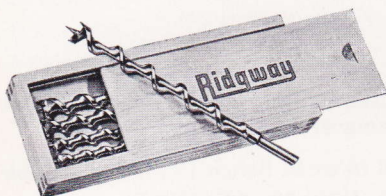

**Ridgway "FLATBITS" are precision made from top
class steel, scientifically heat treated and are guaranteed
to give long and satisfying service.**

WOOD BORING BITS FOR USE IN ELECTRIC HAND DRILLS

No. 350

Solid Centre, Single Spur, Brad Point Bits

Shank machined true round for $\frac{1}{4}$ " capacity chuck.

4" twist, 1" long shank.
